1 General instructions

Be sure to read through these instructions carefully before any manipulation on this SIG SAUER pistol.

Understanding these instructions and the technically correct implementation of the information contained therein are imperative to correct preparation and safety during handling, maintenance and care of this SIG SAUER pistol. Do not use the pistol until you have fully understood all safety instructions and its handling procedures. Should you require further information, do not hesitate to contact your dealer, importer or the manufacturer.

Please observe the local and national legislation governing the ownership, carrying and use of firearms.

Be aware that these pistols, like all firearms, are dangerous.

The pistol accompanying these Handling and Safety Instructions has been sold under the express understanding that the manufacturer and the importer of the pistol decline any responsibility for consequences of manipulations on the pistol or use of the pistol.

This applies in particular to liability for bodily harm or damage to property resulting in part or in whole to:

– use with criminal intent or negligent use,
– improper or careless handling,
– defective, incorrect, hand-charged or recharged ammunition,
– inadequate care of the pistol (e.g. corrosion, damage),
– disregard of malfunctions,
– resale in contradiction of regional legislation and regulations,
– other circumstances beyond our direct and immediate control.

These limitations apply regardless of whether liability is asserted on the basis of contract, negligence or strict liability (including any failure to warn).

The manufacturer and the importer are not liable for incidental or consequential damages such as loss of use of property, commercial loss or loss of earnings and profits.
2 Safety regulations

- Never use the pistol under the influence of alcohol or drugs, during illness or other complaints; they may influence your judgement and reflexes.
- Always consider the pistol as loaded and unsafe until you have verified that it is not by means of the unloading procedure (see Section 5.8).
- During all manipulations, keep the muzzle of the pistol pointed in a safe direction. Safe directions are defined as areas where there are no people, other living creatures or other people’s property.
- Never point the pistol at doors, window panes, walls, concrete, stones or other flat surfaces (including water). Shots can penetrate such surfaces or be deflected into unsafe directions by them.
- Never aim at yourself or other living creatures.
- Never rely on safety mechanisms. They are never a substitute for careful and correct handling of the pistol. Safety devices may sometimes be defective or fail. You alone are the best safety device!
- Always handle your pistol as if the safety mechanisms were defective. The best safety device is the correct, well-exercised and secure handling of the pistol.
- Never shoot a pistol into which there has been ingress of water, sand, dirt or other foreign bodies.
- Never decock the hammer by restraining the hammer and simultaneously pulling the trigger.
- Never let a loaded pistol out of your hands.
- Always unload the pistol immediately after shooting, before putting it down, holstering it or handing it to another authorised person.
- Never hand the pistol to any person who has not thoroughly familiarised himself or herself with the safety regulations and handling of the pistol by reading the accompanying regulations and instructions.
- Never leave the pistol unattended and protect the pistol against unauthorised access.
- Never store the pistol loaded, but remove the magazine and verify that there is no round in the barrel chamber by following the unloading procedure (see Section 5.8).
- Always keep the pistol and the ammunition in different places and ensure that neither can fall into the hands of unauthorised persons or children.

Be sure to read through these instructions carefully before any manipulation on this SIG SAUER pistol and that you have understood them.
### 2.1 Safety instructions

In the individual sections of these instructions, the following safety indications alert you to various risks:

<table>
<thead>
<tr>
<th>WARNING!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information on risks which, if not scrupulously observed, can lead to severe bodily harm or death.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CAUTION!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information on risks which, if not scrupulously observed, can lead to bodily harm or damage to the pistol.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CAUTION!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Information on technical requirements which, if not scrupulously observed, can lead to damage to the pistol.</td>
</tr>
</tbody>
</table>

Each safety indication consists of:

- a header with a signal word, icon and a corresponding colour shading
- a specification of the type and source of the risk
- a specification of potential consequences if the safety indications are not observed
- specifications of measures and bans designed to avoid risks

3.2 Main features

SIG SAUER pistols are modern handguns complying with the latest technical advances in weapon design for military, police and sporting use. The P 232 is a non-locked, recoil-operated pistol with semi-automatic loading, fixed barrel, inner slide catch lever and fixed front sight.

The automatic firing pin safety lock, the safety intercept notch at the hammer, the decocking lever and the Double Action trigger ensure safe carrying of the weapon and permanent, rapid firing readiness without actuating a manual safety lock.

The decocking lever makes it possible to decock the hammer without danger into the safety intercept notch without actuating the trigger. During the decocking procedure the Firing pin remains secured by the automatic firing pin safety lock.

The distinctive contrast sights in conjunction with the ergonomically favourable grip design permit rapid, precision target acquisition and firing.

The enclosed design prevents the penetration of dirt inside the weapon.

The P 239 pistol is available as Double-Action/ Single-Action (DA/SA) and as Double-Action-Only (DAO) version. The DAO version does not have a decocking lever.

3.3 Scope of supply

Included:
- 1 pistol
- 1 magazine
- 1 Handling and Safety Instructions manual
- 1 test group card

Not included:
- Accessories (see Section 11)
- Spare parts (see Section 12)
4  Transporting the pistol

**WARNING!**

*Uncontrolled discharge of shot*
*May lead to death or severe injuries*

- For your own safety and for the safety of others, always transport the pistol in the **unloaded condition** (see Section 5.8), **decocked and under lock**.
- Never carry the pistol on your person with a round in the chamber and the hammer cocked.
- Always carry the pistol in such a manner that, should you fall or otherwise slip, you are able to control the direction of the muzzle.
- Transport the pistol separate from the ammunition in a locked carrying case.
- The pistol and ammunition must not be accessible to children and other inexperienced or unauthorised persons.
- Ensure that you comply with all regional and national laws relating to the transport of firearms.

5  Handling the pistol

5.1 General remarks

For preservation, the pistol is normally delivered with a thin coating of protective grease and oils. Before initial preparation, the pistol must be stripped, the protective coatings removed and then relubricated.

5.2 Initial preparation

**Procedure:**

1. Strip the pistol (see Section 7.1).
2. Clean and relubricate the pistol (see Section 7.3).
3. Assemble the pistol (see Section 7.4).
5.3 Ammunition

**WARNING!**

Incorrect ammunition
May lead to death or severe injuries and damage to the pistol

- For your pistol, use only commercial grade ammunition in the original packaging, which corresponds to the calibre of the pistol. The correct calibre is stamped on the pistol.
- Only use clean, dry, undamaged and factory new ammunition.
- Never use reloaded, "refurbished", hand-loaded, non-standard ammunition, or ammunition of a different calibre.
- Never use dirty, wet, corroded, bent, damaged or oiled ammunition, or ammunition of unknown origin.
- Never leave ammunition unattended.

5.4 Loading the magazine

Procedure:

1. Place round on feeder 53, close to the magazine lips.
2. Press round down and push it to the rear.
3. Load the number of rounds that you intend to shoot.

The number of inserted rounds can be checked through the holes of the magazine tube 51.
5.5 Loading the pistol (ready to fire)

**WARNING!**

**Insufficient awareness of the dangers**

**May lead to death or severe injuries**

- Never load or unload the pistol inside a vehicle, inside a building or any other confined space (except in a designated firing range).

- Before loading, always wipe off any excess grease and oil and check that there is no obstruction in the bore of the barrel.

- Always keep the muzzle of the pistol pointed in a safe direction.

- Do not place your finger on the trigger. Place your finger outside of the trigger guard.

- Do not load the pistol by inserting the magazine until immediately before shooting.

- Never pull the hammer back by hand to cock it.

- Never rely on safety mechanisms. They are never a substitute for careful and correct handling of the pistol.

- Never let a loaded pistol out of your hands.

**Procedure:**

1. Point the pistol in a safe direction.

2. Insert full magazine and check that it engages.

3. Draw back slide to the stop and allow it to fly forward.
   - The pistol is loaded and ready to fire by means of Single Action trigger.
   - The pistol can then be decocked with decocking lever 40. Now the pistol is loaded, decocked and ready to fire with the double action trigger.
   - The Double Action Only pistol (DAO) is decocked and ready to fire.

**Note:**

- Double Action Only pistols (DAO) do not have a decocking lever 40. During every cocking and reloading, the hammer 29C is caught in the safety intercept notch.
### 5.6 Discharging a shot

**WARNING!**

**Insufficient awareness of the dangers**  
**May lead to death or severe injuries**

- Ensure that the target and the environment allow shots to be fired without danger.
- When discharging shots, ensure that neither your fingers, hands or any other parts of the body are located in front of, over or adjacent to the barrel muzzle or the ejection port.
- Never allow other persons to stand beside you where they might be struck by ejected cartridge cases.
- Always wear ear protection and safety glasses when shooting. Alert bystanders to the importance of wearing ear protection and safety glasses.
- Immediately stop shooting and unload the pistol if you suspect that a round has not been chambered properly, a case is jammed, a bullet is lodged in the bore or a discharge sounded or felt weak or abnormal (see Section 8.1).
- Never attempt to dislodge a blockage by firing another round.

**WARNING!**

**Pistol is ready to fire**  
**May lead to death or severe injuries**

- After each discharge, Double Action/Single Action pistols are in cocked and ready-to-fire condition.
- If you wish to interrupt the shooting session, you must press the decocking lever *40 down. The pistol is then in loaded, decocked and ready-to-fire condition.
- After each discharge, Double Action Only pistols (DAO) are in decocked and ready-to-fire condition by means of Double Action trigger.

* *not applicable to DAO*
5.7 Reloading during shooting
Slide is caught in the open position.

**WARNING!**

Insufficient awareness of the dangers
May lead to death or severe injuries
- Never let the pistol out of your hands.
- Keep the pistol pointed at the safe target.

**CAUTION!**

Magazine may fall out
Magazine may be damaged
- Always catch the ejected magazine using your free hand.

**Procedure:**
1. Remove the empty magazine (see Fig. 2).
   - Hold one hand underneath the magazine.
   - Press magazine catch 43 down. The magazine is ejected and caught using the free hand.
2. Insert full magazine and ensure that it engages.
3. Draw back slide 4 to the stop and allow it fly forward (see Section 5.5).
   - The pistol is loaded and ready to fire.
   - The pistol can also be decocked by means of decocking lever 40 (Not applicable to DAO pistols).
   - The pistol is loaded, decocked and ready to fire.

5.8 Unloading the pistol

5.8.1 Unloading the pistol, magazine not empty

**WARNING!**

Pistol is ready to fire
May lead to death or severe injuries
- Never let the pistol out of your hands before it is unloaded.
- The pistol is loaded, a round is located in the chamber of the barrel.
- Execute the unloading cycle with only two fingers from the rear.
- Never place your hand over the ejection port of the slide.

**Procedure:**
1. Keep the muzzle of the pistol pointed in a safe direction.
2. For Double Action/Single Action pistols: Press decocking lever 40 down, the hammer 29 catches in the safety intercept notch. With Double-Action-Only pistols, hammer 29C automatically registers in the safety intercept notch.
3. Press magazine catch 43 down and remove magazine (see Fig. 2).

Fig. 2, Removing the magazine
Handling

4. Draw back slide 4 to the stop and arrest it in the open position. The round is ejected.

5. Check visually and manually with a tool that the round was ejected and that no other round is chambered (see Fig. 3).

6. Release slide 4. The slide 4 is impelled forward.

7. Press decocking lever 40 down (not applicable to DAO pistols).

8. Empty magazine.

9. Pick up and clean ejected round. The pistol is unloaded and decocked.

**WARNING!**

Pistol has not been cleaned sufficiently May lead to death or severe injuries and damage to the pistol

- The pistol must be cleaned after every shooting session (see Section 7.3).

---

*Fig. 3*
5.8.2 Unloading the pistol, magazine empty, slide open

**CAUTION!**

**Pistol is loaded**  
**May lead to death or severe injuries**
- The pistol must not be put down and out of your hand until the magazine is removed and the pistol is unloaded.

**Procedure:**
1. Keep the muzzle of the pistol pointed in a safe direction.
2. Press magazine catch **43** down and remove magazine (see Fig. 2).
3. Check visually and manually with a tool that the round was ejected and that no other round is chambered.
4. Draw back slide **4** to the stop and allow it to fly forward.
5. Press decocking lever **40** down (not applicable to DAO pistols).
6. Check the load state of the magazine. The pistol is unloaded and decocked.

**WARNING!**

**Pistol has not been cleaned sufficiently**  
**May lead to death or severe injuries and damage to the pistol**
- The pistol must be cleaned after every shooting session (see Section 7.3).

---

6  Sight correction

6.1  Sight correction for windage

6.1.1  Shifting the rear sight

**Note:**
- An Allan key is required for this purpose.

Shifting the rear sight **6** by 0.5 mm to the right alters the point of impact to the right by approx. 10.4 cm at a 25 m range.

**WARNING!**

**Pistol is loaded**  
**May lead to death or severe injuries**
- The pistol must not be put down and out of your hand until the magazine is removed and the pistol is unloaded.

**CAUTION!**

**Pistol may be damaged**
- Sight corrections should only be carried out on an unloaded pistol by an armourer, gunsmith or an expert. An Allan key is required for this purpose (see Section 6.1).

---

Fig. 4, Slacken and fix the rear sight with Allen key (H)

Fig. 5, Point of impact is on the left
6.2 Sight correction for elevation

6.2.1 Changing the rear sight
Changing the rear sight 6 for a deeper rear sight (one front sight increment) alters the point of impact by approx. 6.2 cm at a 25 m range.

6.3 Rear sight variants

Fig. 6, Point of impact is high
7  Pistol maintenance

**WARNING!**

**Pistol is ready to fire**

*May lead to death or severe injuries*

- The magazine must be removed from the pistol.
- Before stripping your pistol for cleaning, ensure once again that it is unloaded (see Section 5.8).
- Do not grasp slide 4 with your fingers.

**CAUTION!**

**Slide and recoil spring unit are only connected loosely with each other**

*May lead to injuries and damage to the pistol*

- The recoil spring 3 is cocked. Uncontrolled forward slipping of the slide 4 can cause it or the recoil spring 3 to jump away. When stripping, control decompression of the preloaded recoil spring 3 with your hand.

5. Lift and hold slide 4 in the back and allow it to glide forward.

6. Slip slide 4 forward and off the frame.

**7.1 Stripping the pistol**

**Procedure:**

1. Unload the pistol (see Section 5.8).
2. Thumb down takedown lever 16.

3. Draw back slide 4 to the stop and arrest it in the open position.
4. Check that no round is chambered (see Fig. 3).

---

**Fig. 7**

**Fig. 8**

**Fig. 9**
7. Pull recoil spring 3 off the barrel 1.

Note:
- This level of stripping is sufficient to allow a thorough cleaning after shooting.
- Further dismantling of the pistol may only be carried out by qualified armourers and gunsmiths.

7.2 Disassembly of the magazine

CAUTION!
Magazine spring is compressed
May lead to injuries and damage to the pistol
- Do not carry out any work on the pistol near your face and hold magazine with the magazine floor plate pointing downwards.
- When removing the magazine spring, decock it slowly and with care.

Procedure:
1. Use a small screwdriver to push the lower end of the magazine spring 52 upwards and out of the opening in the magazine floor plate 54. Push magazine floor plate forward and remove it. Place one hand under the magazine to make sure that the magazine spring does not fall out.

2. Slowly decock the magazine spring 52, push it downwards together with the feeder 53 and remove it from the magazine tube 51.
7.3 Cleaning the pistol

**CAUTION!**

**Pistol may be damaged**

- Never clean barrel 1 from the muzzle end and do not use a steel wire brush as it can destroy the smooth surface of the barrel. Use a suitable cleaning rod and a brush of matching calibre (see Section 11).
- Solvents can be harmful to the surface finish of the pistol. Read the manufacturer's notes and warnings before using solvents or cleansers.

**Procedure:**

1. Lubricate the cleaning brush with gun oil and insert it into the barrel 1 via the chamber. Use brush to carefully remove all powder residues and dirt in the barrel and chamber.
2. Wipe powder residues and oil from the barrel bore and chamber with cleaning patches.
3. Clean external surfaces of barrel with a brush dipped in gun oil.
4. Remove dirt from metal guide in the frame 15, inside and outside of slide 4 and recoil spring 3 with a brush and cleaning patch and then wipe down with a cloth impregnated with gun oil or gun grease.
5. Lightly oil bores of barrel and chamber. Remove any excess lubricant.

Fig. 12, stripping weapon for cleaning
7.4 Assembling the pistol

Procedure:
1. Check that there is no foreign matter inside the pistol.
2. Check that serial number, slide number and frame number tally.
3. Cock hammer 29 (not applicable to DAO pistols).
4. Slide the recoil spring 3 with the smaller diameter on the barrel 1 first.
5. Thumb down takedown lever 16.
6. Lead slide 4 over the recoil spring 3 and pull over the barrel 1 with slightly lifted end until the rear part.
7. Lift the rear part onto the frame 15 and let the slide glide forward with your hand.

CAUTION!
Slide and recoil spring are only connected loosely with each other
May lead to injuries and damage to the pistol
- The recoil spring 3 becomes preloaded when the slide 4 is pushed on. If the recoil spring is not carefully installed in the slide, the slide can fly out under the force of the recoil spring and injure you or someone in your vicinity.
8. Flip up the takedown lever 16 clockwise.

9. Press decocking lever 40 down (Not applicable to DAO pistols).

   **Note:**
   • The pistol is unloaded and decocked.

### 7.5 Verification of functions

**Note:**
• Verification of functions must be conducted on the assembled pistol:
  – to identify causes of malfunction,
  – after completion of repairs,
  – and after each cleaning and assembly of the pistol.

**Procedure:**
1. Make sure that the magazine is removed and the pistol unloaded (see Section 5.8).
2. Check the elasticity of the recoil spring 3 and the smoothness of the slide 4 (no jamming).
   – Draw back slide to the stop and allow it to fly forward.
   – Check that slide is impelled forward with sufficient energy and that it engages.
   – Repeat the verification test.
3. Check the double-action trigger (DA).
   – With hammer 29 decocked, pull trigger 20 through.
   – Check that hammer cocks and that at the end of trigger travel, it strikes firmly forward and comes to rest in the safety intercept notch.
   – With hammer 29 decocked and trigger 20 pulled through, draw back slide 4 to the stop and release it.
   – Check that hammer 29 is restrained in its cocked position (trigger remains pulled through).
     (Not applicable to DAO pistols. With DAO pistols, decocked hammer 29C must be registered in the safety intercept notch).
5. Check simple trigger function (SA).
   (Not applicable to DAO pistols)
   – Check that trigger bar 22 reengages and whether hammer 29 drops when the trigger is pulled again.
6. Check function of decocking lever 40 and safety intercept notch on hammer 29.
   – Cock hammer 29 and decock it with decocking lever 40 without touching trigger 20 (not applicable to DAO pistols).
   – Check that hammer 29 is arrested in the safety intercept notch before reaching its forward end position and trigger is guided to the rest position.
7. Check slide catch lever 18.
   – Insert empty magazine, draw back slide 4 to the stop and release it.
– Check that slide remains caught in its rearmost position.
– Remove magazine 51.
– Draw back slide 4 to the stop and release it. The slide must be impelled forward with sufficient energy.
– Actuate decocking lever 40 (not applicable to DAO pistols).

8. Inspect magazine.
– Check condition of the magazine tube 51 for signs of damage or dirt (lips and floor plate).
– Check that the magazine floor plate 54 is properly secured.
– Check free movement and spring action of feeder 53.
– Check smooth insertion of magazine into frame 15.
– Check magazine catch 43 for clean engagement and release.

9. Inspect external appearance of the pistol.
– Check front sight 5, rear sight 6, grip plates 48/49 and takedown lever 16 for damage and dirt.
– Check that rear sight, front sight and grip plates are firmly secured.

10. Verification of numbered components.
– Check that serial numbers of barrel 1, slide 4 and frame 15 correspond.

### 7.6 Care of the pistol

**CAUTION!**

Inadequate care of the pistol
May lead to injuries and damage to the pistol

- Always keep your pistol in immaculate condition and in good working order.
- Always clean your pistol after use.
- Never modify or repair parts of your pistol yourself.
- Have your pistol checked once every 12 months by a qualified gunsmith or armourer because defects, wear, corrosion, etc. are not always visible from the outside.
- For repairs or service work, however, we recommend that you return your pistol to the manufacturer who always holds a full range of spare parts in stock.
- If you order spare parts without returning the pistol, you are responsible for ordering the correct part and its correct fitting by a qualified gunsmith or armourer.

The manufacturer and the importer cannot be held liable for faults in the pistol or malfunctions if the pistol has been modified or non-original parts have been fitted or repairs have been carried out by third parties.
8 Pistol service and repairs

8.1 Cause and correction of malfunctions
Pistol maintenance (cleaning and inspection) according to the instructions can prevent malfunctions.

Should, nevertheless, a malfunction occur during shooting, proceed as follows:

![WARNING!]

Uncontrolled discharge of shot
May lead to death or severe injuries

- Hold pistol pointed in the firing direction (safe direction) and keep your finger off trigger 20 while you carry out the operations described in the following.

8.2 Procedure:

1. Remove and safeguard the magazine.

2. Draw back slide 4 to the stop and arrest it in the open position.

3. Verify (visually or with a tool) that there is no bullet, round, case or foreign body in the chamber or barrel bore (see Fig. 3). If a projectile is lodged in the bore, strip the pistol (see Section 7.1) and have the blockage removed with a suitable tool by a qualified gunsmith.

4. Remove round, cartridge case or foreign bodies. Clean, lubricate and assemble the pistol (see Section 7.3 and 7.4).

5. Have the pistol inspected by an armourer or gunsmith.

8.3 Safekeeping and storage of the pistol

WARNING!

Uncontrolled discharge of shot
May lead to death or severe injuries

- Always store your pistol unloaded and in cleaned condition.
- Store your pistol separate from its ammunition and under lock and key. The pistol and ammunition must not be accessible to children and other inexperienced or unauthorised persons.

8.4 Shipping the pistol

Note:
- Familiarise yourself fully with regional legislation governing the shipping and transportation of firearms.

Procedure:
1. Check the pistol to ensure that it is unloaded and decocked.
2. Pack the pistol well (if possible in its original packaging) to prevent damage in transit. To prevent the pistol being recognised as such during shipping, wrap the original packaging in a second outer layer. Do not include any other accessories in the shipment.
3. Enclose a letter stating the following:
   - your full name
   - your full address (mention street, not P.O. Box)
   - your daytime telephone number
   - model and serial numbers of the pistol
   - detailed description of the problem encountered or the service work to be performed.
4. Send the pistol properly insured and carriage-paid (packages without correct postage will not be accepted) to:
   - the sales outlet from which you purchased the pistol
   - the local appointed J. P. Sauer & Sohn dealer
   - the J. P. Sauer & Sohn agent (importer) for your country
   - if there is no local appointed Sauer & Sohn dealer or Sauer & Sohn agent in your country, to J. P. Sauer & Sohn GmbH.
